# Orientalists

Here we are, engrossed in studying various Sciences, Disciplines, Arts and Skills. Be it Physics, Chemistry, Zoology, Geography, Biology, etc. we all in our curriculum are studying them. If we ponder over the reason of us studying these subjects, then our conscious will oblige us to say that the reason is nothing but getting a good source of income. Meanwhile our study does not directly focus on the benefit of our religion. An average person spends 25 yrs of his life studying which means 41% of his life just to spend the rest 59% luxuriously. But let me introduce you to those people who are studying **Arabic, Latin, Hebrew, Persian, Greek Sciences etc.** and they expend their whole lives for these subjects. You must be thinking that I'm talking about religious scholars (The Ulama)? No! My dear readers this group of people is a different one. **They study the Holy Qur'an, the Blessed Prophetic Narrations, they study Bukhari, Muslim, Sunan Abi Dawood and all those Islamic scriptures.** But! The people studying them are not Muslims, rather Christians, Jews and Zoarastrians. Masters in their fields, in language and cultural analysis. But with a dark mission, a mission which involves the destruction of humanity. "The Mission to destroy Islam". These are 'the Orientalists'. There can be mentioned tremendous amount of names, be it **Theodore Noldeke,**

**Montgomery Watt, Ignac Goldzeihr**, they all declared war with Islam, they tried to raise doubts on the Qur'an, they wrote poisonous contents regarding the book of Allah, visibly it looks like they have written thesis on the Qur'an but actually **they have tried to make the believers doubt the Qur'anic verses, with lies, blames, fallacy, mockery, treachery**. They are not researchers, they are refuters or rather rebukers of the Qur'an. This all propaganda is going till the date.

But what can be said about the ignorance of Muslims, they are busy in gathering wealth and worldly things. Save aside understanding it, they don't even read the Qur'an. **They are becoming Doctors and Engineers and what not, but with it they are also becoming ignorant from Islam**. The books of all subjects have been written by people but the Book of Allah has been revealed from the Heavens, still we are unaware of it's message. **We are illiterate from reading and understanding the Qur'an**. The Qur'anic for us is under the cloak of unseen. It is really a place to shed tears of blood, the Nation which was made "**the people of the book**" are illiterate from their own book.

**Tell me O dear Readers!** if you will not study Islamic Scriptures then who will fight with these Western scoundrels? Who will answer these people who rebuke the Qur'an and the Sunnah? They spent their whole lives for this dark purpose, and we are not ready to spend a few moments of our lives in reading Islamic content? It is really shameful that we still think of

ourselves as '**Complete Muslims**'. Know that this world will perish and there'll be nothing left except Allah and when he will resurrect us and if he asks that he gave us life and health and intellect, then why didn't we read the book revealed by him, what will we answer him? What excuse can we possibly give? That we were busy in beautifying our Duniya? No! Dear ones this excuse will lead us straight towards blazing fire.

**Time has come** to bring about a change in our lives, to start learning about Islam and start reading Islamic content. So that we can tackle every tsunami which raises against Islam. **Let our chests be shields, our hands be spears and let us fight every person who tries to stand against our Islam. Let us fight fallacy with facts, mockery with patience and thoughtful research, blames with historical evidences. And let us spread the message of peace and harmony to the world, the message of Qur'an. Let us endow our lives to the mission of our Master Muhammad ur Rasoolullah ﷺ** so that our world and hereafter are beautified and we can be successful in both worlds.

**Sag e Bargah e Tajushariyah** ﷺ
